5   Claims

What is claimed is:

1.   A portable pet-feeding container, comprising:

a reservoir with an open top;

a removable lid for sealingly covering said open

10   top of said reservoir;

a skirt surrounding said reservoir, said skirt

including structure (for attaching a leash); and

a handle connected to said skirt.

15   2.   The portable pet-feeding container of Claim 1,

wherein said structure for attaching a leash is a (module *never referred as to 'spec.*

with a hole.

3.   The portable pet-feeding container of Claim 1,

20   wherein said handle comprises a storage tube and a

removable storage tube lid.

4.   The portable pet-feeding container of Claim 1,

wherein said skirt has a top surface and side surfaces

25   extending downwardly to a flat base.

5.   The portable pet-feeding container of Claim 4,

wherein said flat base includes a cavity for lid storage.

30   6.   The portable pet-feeding container of Claim 4,

wherein said flat base comprises a movement-preventing *not in spec.*

5   structure for securing said portable pet-feeding container

to a surface to prevent movement of said pet-feeding

container on said surface.

misdescriptive

7.   The portable pet-feeding container of Claim 6,

10   wherein said movement securing structure includes rubber

circlets attached to the bottom surface of said flat base.

L7 or handle

8.   The portable pet-feeding container of Claim 1,

wherein said skirt includes grooves for holding a leash

15   (which is wrapped around said container) *+ but didn't previously claim leash*

9.   The portable pet-feeding container of Claim 1,

wherein said reservoir is within said skirt.

20   10.   The portable pet-feeding container of Claim 1,

wherein said reservoir has an open top with a threaded

inner surface for receiving a spill resistant ring and

said removable lid.

25   11.   The portable pet-feeding container of Claim 1,

wherein said removable lid has a threaded side surface and

a notched top surface for sealably twisting said removable

?, spec.

lid onto an open top of said reservoir.

30   12.   The portable pet-feeding container of Claim 1,

wherein said reservoir, said removable lid, said skirt,

5   and said handle, are comprised of materials selected from
the group consisting of metal, rubber, and plastic.

13.   A portable pet-feeding container system,
comprising a first portable pet-feeding container
10   removably coupled to a second portable pet-feeding
container.

14.   The portable pet-feeding container system of Claim
13, wherein said first portable pet-feeding container
15   comprises:

a first reservoir with an open top;

a first removable lid for sealingly covering said
open top of said first reservoir;

a first skirt surrounding said first reservoir,
20   said first skirt including a leash coupling structure;
and

a first handle connected to said first skirt.

15.   The portable pet-feeding container system of Claim
25   14, wherein said second portable pet-feeding container
comprises:

a second reservoir with an open top;

a second removable lid for sealingly covering said
open top of said second reservoir;

5   a second skirt surrounding said second reservoir,

said second skirt including a leash coupling structure;

and

a second handle connected to said second skirt.

10   16.   The portable pet-feeding container system of Claim

15, wherein said first skirt is movably coupled to said

second skirt by a detachable hinge connection.

17.   The portable pet-feeding container system of Claim

15   16, wherein said hinge connection comprises a rod, and arm

hooks and an end wall extending from one end of each of

said containers.

18.   A method for traveling with a pet using a portable

20   pet-feeding container, said method comprising:

providing a portable pet-feeding container;

providing food and/or water in a reservoir of said

container;

fastening a removable lid onto an open top of said

25   reservoir;

coupling one end of a leash to a said container;

coupling another end of said leash to a pet;

using a handle to carry the portable pet-feeding

container while controlling the pet;

30   shortening a leash by wrapping said leash around a

skirt, as necessary; and

5   traveling with pet from a first location to a
second location.

19.   A method for traveling with a pet using a portable
pet-feeding container system, said method comprising:

10   providing a first portable pet-feeding container
with a first reservoir, first skirt and first handle;
providing a second portable pet-feeding container
with a second reservoir, second skirt and second
handle;

15   providing food and/or water in the first and
second reservoirs;
fastening first and second removable lids onto
open tops of said first and second reservoir; and
coupling said first skirt to said second skirt

20   such that said first lid is adjacent said second lid
and said first handle is adjacent said second handle to
form a composite handle.

20.   The method of claim 19 further including:

25   coupling one end of a leash to said pet-feeding
container system;
connecting another end of said leash to a pet;
using said composite handle to carry the portable
pet-feeding container system while controlling the pet;

30   shortening a leash by wrapping said leash around
at least one skirt, as necessary; and

26

5   traveling with a pet from a first location to a
second location.
